

P414

P414 -Peritoneal dialysis

Dr Mark Lambie¹

¹*Keele, ,*

Our aims:

- increasing the quality, relevance and impact of peritoneal dialysis related clinical research
- building a dynamic research culture within peritoneal dialysis, with the aim of improving outcomes for patients treated with this dialysis modality
- developing research capacity and expertise.

Who we are:

Our membership is open to anyone with an interest and currently comprises of clinical researchers, nurses, doctors, patients, scientists and clinical research co-ordinators from across the UK. We have strengthened and grown research in this area in the UK and our annual meetings have showcased clinical research activity and provided a forum for debate. Smaller, informal meetings have taken place at conferences and the PD academy meetings have stimulated ideas, the development of protocols and research grants.
